

JAVA DEVELOPER

A.E.C. Programmer Analyst LEA.CK:
Profile Full Stack Java Developer

Program viewbook 2021 | 2022

Full Stack development comprises of developing applications from both the aspects of software – client-side and server-side, meaning one has to write code that resides on the server and performs certain operations (talking to DB/processing requests) and also for users who interact with the application from UI. Even more it involves creation and management of databases as most of the applications would be having a backend database (RDBMS mostly).

**\$27.7 billion dollar
Java Developer market by 2023,**

A Java developer is a specialized type of programmer who may collaborate with web developers and software engineers to integrate Java into business applications, software and websites. They are involved throughout the entire development life cycle of a product and must be able to identify and analyze any issues or problems and be able to come up with an efficient solution. Other duties may include collating and documenting user requirements, analyzing data and quality assurance testing.

A comprehensive Java Developer program at Montreal College IT

According to the TIOBE programming community index, Java has been the most popular programming language in the world since 2002. Java is the language of choice for creating applications, be it desktop or web or even mobile. And today's tech landscape has emerged with an ever-growing demand for developers who do not just code but also able to design, test and if need be provide architectural solutions. These professionals are called the Full Stack developers. MCIT's Full Stack Java Developer path is one such program which makes you an end-to-end developer who takes care of the overall product development with expertise in Java and other related technologies.

You shall be exposed to the in-demand frameworks such as Spring and Hibernate; technologies of presentation layer-JavaScript, HTML, and CSS. As you gain proficiency in developing applications using core Java technologies, introduction to more advanced concepts of Servlets and JSP shall be followed to enable you to build dynamic websites.
