Job Description:

Job title	*Teacher/Instructor in Software testing & Quality Assurance*
	(Minimum 4+ years' experience in Software testing – Part time)

About MCIT:

Montreal College of Information Technology is a pioneer institution focused on delivering fast-paced, intensive IT programs. MCIT is a national forerunner in producing competent professionals with an emphasis on fast-paced career-oriented technical education. Our main focus is on designing up-to-date programs in information technology. Consistent with our vision, Montreal College strives to provide, through its state of the art technical capabilities, an empowering, conducive and inspirational learning experience to its technology learners to build their enduring prowess in a shorter yet intensive framework.

Job Description:

The AEC program in Software Testing covers both aspects of testing, manual and automated. The program focuses on: Fundamentals of Software testing, Fundamentals of Java, Object-Oriented Programming, Selenium, SQL, HP ALM and JIRA Software. Instructors are expected to deliver quality lessons, as well as lab work that follow academic standards.

Responsibilities:

- Plan, prepare and deliver lesson plans and instructional materials that facilitate active learning.
- Maintain discipline in accordance with the rules and disciplinary systems of the college.
- Assist students and provide appropriate feedback on their work
- Instruct and guide students during lab hours
- Deliver program in stipulated time as per ministry regulations
- Update all necessary records accurately and completely as required by college regulations.
- Assign and grade homework, tests and assignments.
- Communicate with college staff to understand the program expectations.

Skills, Knowledge & Experience:

General Skills:

- Bachelor's Degree in Computer Science or equivalent related field
- Minimum 3+ years hands-on experience in the relevant field
- One or more years of experience in Teaching (in the relevant field) preferred
- Must have commanding experience in manual testing and software quality assurance
- Good to have an ISTQB certification.

Soft Skills:

- Must possess excellent communication and presentation skills
- Ability to explain new ideas and unfamiliar concepts in a clear and concise way so that students can understand.
- Ability to handle students of different backgrounds effectively.
- To be able to find ways to involve students in their lessons. If needed, I may have to work with different learning styles to get the most out of each student.

Technical Skills:
Candidate can apply if their skills fall into any one of the below groups.

Group	Description
1	● Experience in automated testing on enterprise applications. ● Must have strong knowledge in automation testing and Selenium suite.
2	● Experience in supporting tools of software testing like JIRA or Microsoft TFS. ● Must have commanding experience in ALM.

Additional Information:

- Job type: Part-time
- Shift: Morning, Evening, and/or Weekend
- Location: Montreal (Downtown)
- Salary to be discussed
